SERIES 141

PRICE GROUP A

Series 141 mini couplings are among the smallest couplings on the market. The series offers CEJN's popular product features in a small package and is suitable for pneumatic applications as well as fluid and vacuum lines

Technical Data:

Nominal flow diameter	2,5 mm
Airflow	86 l/min
Max. working pressure	10 bar
Min. burst pressure	40 bar
Temperature range	- 30 °C - + 100 °C
Material coupling	Chrome-plated brass
Material nipple	Chrome-plated brass

COUPLING		Size	Part No.	€ / pc
Male thread		G 1/8"	10 141 1251	52,75

NIPPLE		Size	Part No.	€ / pc
Female thread		G 1/8"	10 141 5201	16,80

SERIES 220

PRICE GROUP A

Series 220 couplings are suitable for compressed air, as well as fluid and vacuum applications. They offer high flow capacity for a wide range of applications. Safety rings to prevent unintentional disconnection are available on request.

Technical Data:

Nominal flow diameter	5 mm
Airflow	580 l/min
Max. working pressure	35 bar
Min. burst pressure	140 bar
Temperature range	- 30 °C - + 100 °C
Material coupling	Nickel-plated brass
Material nipple	Hardened zinc-plated steel Nickel-plated brass (series 221)

COUPLING		Size	Part No.	€ / pc
Hose connection		5 mm (3/16")	10 220 1001	28,90

SERIES 303

PRICE GROUP D

Series 303 has high flow capacity. Series has many different sizes and they are also suitable for vacuum applications. Male threads on the couplings and nipples feature pre-applied thread sealant.

Technical Data:

Nominal flow diameter	6,5 mm
Airflow	1450 l/min
Max. working pressure	16 bar
Min. burst pressure	140 bar
Temperature range	- 20 °C - + 100 °C
Material coupling	Zinc-plated steel/brass
Material nipple	Hardened zinc-plated steel
Connection force	85,0 N
Interchangeable with	TEMA 1300, Rectus 31

eSafe

eSafe Series 310 offers a wide range of easy-to-grip couplings. Male threads on the couplings and nipples feature pre-applied thread sealant. eSafe series complies with ISO Standard 4414 and EN 983.

Technical Data:

Nominal flow diameter	5,3 mm
Airflow	950 l/min
Max. working pressure	16 bar
Min. burst pressure	140 bar
Temperature range	- 20 °C - + 100 °C
Material coupling	Zinc-plated steel/brass
Material nipple	Hardened zinc-plated steel
Connection force	86 N
Interchangeable with	AtlasCopco QIC08, Hansen 300

SERIES 320 eSafe

PRICE GROUP A

eSafe Series 320 coupling is an easy-to-handle high performing coupling with a long service life. eSafe is a one hand operated safety coupling that vents before disconnection eliminating the risk of hose whip. Male threads on the couplings and nipples feature pre-applied thread sealant. The couplings have a smaller outside dimension than comparable designs. Full automatic operation ensures easy handling. eSafe complies with ISO Standard 4414 and EN 983.

Technical Data

Nominal flow diameter	7,6 mm
Airflow	2250 l/min
Max. working pressure	16 bar
Min. burst pressure	140 bar
Temperature range	- 20 °C - + 100 °C
Material	Hardened zinc-plated steel
Connection force	86,0 N
Interchangeable with	Tema 1600, Rectus 25

SERIES 326, eSafe STAINLESS STEEL

PRICE GROUP A

Durable and robust for tough environments. Series 326 is interchangeable with series 320.

Technical Data:

Nominal flow diameter	7,6 mm
Airflow	1800 l/min
Max. working pressure	16 bar
Min. burst pressure	140 bar
Temperature range	- 20 °C - + 100 °C
Material coupling	Stainless steel (AISI 316)
Material nipple	Stainless steel (AISI 316)

SERIES 331 eSafe

PRICE GROUP A

Series 331 has high flow capacity, they are easy to handle and are strong and durable. eSafe series complies with ISO-4414 and EN 983

Technical Data:

Nominal flow diameter	7,1 mm
Airflow	1740 l/min
Max. working pressure	16 bar
Min. burst pressure	70 bar
Temperature range	- 30 °C - + 100 °C
Material coupling	Zinc-plated steel/brass
Material nipple	Hardened zinc-plated steel
Interchangeable with	Atlas Copco QIC10, Rectus 33, Tema 1650

SERIES 408

PRICE GROUP D

Series 408 has high flow capacity. Series has many different sizes and they are also suitable for vacuum applications.

Technical Data:

Nominal flow diameter	9,5 mm
Airflow	3450 l/min
Max. working pressure	16 bar
Min. burst pressure	140 bar
Temperature range	- 20 °C - + 100 °C
Material coupling	Zinc-plated steel/brass
Material nipple	Hardened zinc-plated steel
Connection force	160,0 N
Interchangeable with	Tema 1800, Rectus 32

SERIES 410 eSafe

PRICE GROUP A

eSafe Series 410 is a safety coupling based on CEJN Series 410, a CEJN original and European standard. The Series offers long service life. It is a one hand operated safety coupling that vents before disconnection eliminating the risk of hose whip. The fully automatic operation ensures quick and easy handling. It complies with ISO Standard 4414 and EN 983 and has a steel front part as standard.

Stainless steel version is available in series 416 and brass version in series 411.

Technical Data

Nominal flow diameter	10,4 mm
Airflow	4000 l/min
Max. working pressure	16 bar
Min. burst pressure	140 bar
Temperature range	- 20 °C - + 100 °C
Material coupling	Zinc-plated steel/brass
Connection force	140,0 N
Interchangeable with	Tema 1700, Rectus 27

COUPLING, eSafe

MULTI-LINK SYSTEMS

PRICE GROUP A

The Multi-Link integrated quick connect couplings come in units of 1 to 5 outlets. The units can also easily be connected to create more access points. Ideal for uncluttering existing work areas or to create new flexible work stations. The integrated couplings provide flexibility and high performance, the design allows for a large number of outlets without restricting the flow with T-connections, bends or elbows. Combine with our high quality polyurethane hose to create a flexible high performance air distribution system.

Technical Data:

Max. working pressure	16 bar
Temperature range	- 20 °C - + 100 °C
Material	Zinc-plated steel
Thread size	G 1/2" female thread

SERIES 320 eSafe MULTI-LINK

eSafe is a one hand operated safety coupling that vents before disconnection eliminating the risk of hose whip.

	Part No.	€ / pc
1 coupling	19 902 9201	97,25
2 couplings	19 902 9202	134,00
3 couplings	19 902 9203	171,00

AIR & FLUID GUNS

PRICE GROUP A

Series 208

Series 208 is offered in several styles, including standard full-flow, noise-reducing Star-Tip, and a pressure-regulated safety version. Various tubes and tips are available to meet specific application requirements.

Technical Data:

Airflow	500 l/min (with 90mm tube)
Max. working pressure	16 bar
Connection	1/4" female thread
Weight	112 g (with 90 mm tube)
Material	POM (body), stainless steel
Temperature range	-20 °C - + 60 °C
Media	Air and non-explosive water based liquids

The "OK" symbol indicates fulfillment of the safety requirements stated by OSHA when dead-ending occurs. Static pressure at the orifice will not exceed 2 bar (30 PSI).

The "ear" symbol indicates a sound level below 85 dB(A) and fulfillment of requirements of the EU Machine Directive §1.5.8 concerning noise reduction demands.

SERIES 208

90 mm tube

Tube	Part No.	€ / pc
Fixed	11 208 0100	28,90

NORDIC RANGE 525

PRICE GROUP D

CEJN Nordic Range 525 are somewhat of a “Nordic standard” in steel. Its heavy-duty design ensures maximum durability and high performance. The products are equipped with additional security locking and extra sealing for improved performance. The optional pressure eliminator facilitates a low connection force even when either half is under residual pressure. The couplings and nipples are made of plated steel and those parts exposed to extreme strain and stress are hardened for extra durability.

Stainless steel version is available in series 526, on page 50.

Technical Data:

Material coupling	Steel (zinc-nickel)
Material nipple	Hardened steel (zinc-nickel)
Coupling	Double o-ring
Temperature range	- 30 °C - + 100 °C
Material seal	NBR

SIZE 1/4"

SERIES X65-SERIES, FLAT-FACE

PRICE GROUP D

CEJN Series X65 quick connect couplings and nipples are compliant with the ISO 16028 Standard. The couplings and nipples are made of plated steel and available in seven sizes ranging from DN 5 to DN 25. An extra security locking offers added protection against involuntary disconnection. A perfect fit for tough hydraulic applications. We deliver Flat-Face coupling up to size 2", also with SAE and NPT threads.

Stainless steel version is available in series X66, page 48.

Technical Data:

Material coupling	Steel (zinc passivation)
Material nipple	Hardened zinc-plated steel
Material seal	Nitrile (NBR/PUR, other sealing materials on request)

WEO PLUG-IN

PRICE GROUP B

WEO Plug-Ins have click-to-connect and self aligning features that make them easy to install in hydraulic systems. With the simple connection and disconnection of the WEO fittings, only a common screwdriver is needed for service or assembly replacements.

The coupling can be used with most of the hydraulic hoses (Max. 1")

TLX COUPLINGS AND NIPPLES

PRICE GROUP A

TLX is a Flat-Face twist lock coupling for the toughest applications in the construction and demolition segment. This super-duty quick connect coupling is designed to work with the highest surge flows and the toughest pressure impulses. TLX is made from high alloy steels with Zinc-Nickel surface treatment for a long life in the harshest conditions.

MULTI-X RANGE

PRICE GROUP B

All plates are designed with spill free Flat-Face couplings according to ISO 16028. Nipples with integrated pressure eliminators ensure smooth connections even with high residual pressure. For optimal flexibility both the male and female plate can be used as the fixed part and each plate can also be outfitted with electric connectors.

Technical Data:

Max. working pressure	350 bar
Min. burst pressure	1200 bar
Temperature range	-30 °C - + 100 °C
Material female plate	Zinc plated steel, anodized aluminum, zinc, brass
Material male plate	Zinc plated steel, anodized aluminum, brass
Material seal	NBR/PUR

Flow (4 bar pressure drop)

DN 10	40 l/min
DN 12.5	75 l/min
DN 19	170 l/min
DN 25	350 l/min

The rubber dust caps, mounting bracket and WEO nipples are enclosed with each plate, but can also be purchased separately.

FLAT FACE SCREW TO CONNECT, SERIES VP-P

PRICE GROUP E

The VP-P screw flat face coupling series is the technological solution to demanding hydraulic applications. The screw connection system eliminates premature wear and the “brinelling” caused by a mechanical locking ball system. This makes the VP-P series suitable for high operating and impulse pressures. The safety sleeve integrated in the connection system prevents accidental disconnection making the VP-P series ideal for the most extreme operating conditions where strong vibration and torsion issues are present.

Technical Data:

- Can be connected under a pressure of 250 bar
- The safety sleeve is integrated and it connects automatically
- Model with BSP-thread is stored, NPT and UNF are also available

MULTI COUPLINGS

PRICE GROUP E

Multi couplings offer solutions for applications requiring connection and disconnection of several hydraulic, electrical and pneumatic lines in reduced spaces without any risk of incorrect connection of the lines. Using FAP couplings with triple valve system, it is possible to connect and disconnect with high residual pressure in the circuit.

Multi coupling plates are available in different sizes and versions. The most common plates are equipped with 2, 4 or 6 couplings. The maximum amount of connections is 10 couplings. The multi coupling kit includes female plate with a handle, male plate and dust cover. Rack can be purchased separately. Couplings are mounted on the plates with threaded sleeves or seeger/snap rings for easy installation or replacement.

Technical data:

NORDIC RANGE STAINLESS STEEL SERIES 526

PRICE GROUP A

CEJN Nordic Range 526 are somewhat of a "Nordic standard" in stainless steel. Its heavyduty design ensures maximum durability and high performance. The products are equipped with additional security locking and extra sealing for improved performance. The couplings and nipples are made of stainless steel.

Steel version is available in series 525.

Technical Data:

Material Coupling:	Stainless steel AISI 316
Material Nipple:	Stainless steel AISI 316
Material seal	Viton (FPM)
Temperature range	- 20 °C - + 205 °C
Connectability	Whitout pressure
Max. working pressure	1/4", 3/4", and 1": 200 bar 3/8" and 1/2": 300 bar

X66 RANGE, FLAT FACE STAINLESS STEEL

PRICE GROUP A

- We deliver Flat Face couplings up to size of 2"
- Couplings available with NPT and SAE threads

CEJN Series X66 quick connect couplings and nipples are dimensionally in accordance with the ISO 16028 Standard. The couplings and nipples are made of stainless steel and available in four sizes ranging from DN 6.3 to DN 19.

An extra security locking offers added protection against involuntary disconnection. A perfect fit for hydraulic/fluid applications with corrosive media or in corrosive environments such as the offshore, chemical, paper/pulp and food industries.

Technical Data:

Material, coupling	Stainless steel AISI 316
Material, nipple	Stainless steel AISI 316

NON-DRIP BRASS

PRICE GROUP A

With unlimited combination possibilities, CEJN Non-Drip modular couplings are adaptable to virtually all applications and system requirements. The Non-Drip design of the Series ensures practically zero spillage and eliminates pollution and air inclusion during connection and disconnection. The Series is available in three configurations: straight through, single shut-off and double shut-off. Series are also available with color-coding and/or key coding for extra safety. Optional seal material and threads upon request.

Technical Data:

SERIES 321

PRICE GROUP A

Featuring valved couplings and valveless nipples, Series 321 has superior flow capacity.

Technical Data:

Nominal flow diameter	7,4 mm
Flow (4 bar pressure drop)	78 l/min
Max. working pressure	35 bar (20 MPa)
Min. burst pressure	140 bar (60 MPa)
Temperature range	- 20 °C - + 100 °C
Material coupling	Nickel-plated brass
Material nipple	Nickel-plated brass
Interchangeable with	CEJN 320

SERIES 417 AND 411

PRICE GROUP A

The straight-through, valveless design of Series 417 couplings makes them ideal for garden and other low-pressure applications in which there is no need for valved-style coupling. 417 is interchangeable with series 411. Series 411 couplings are equipped with valves.

417 Technical Data:

Nominal flow diameter	10,5 mm
Flow	226 l/min (4 bar pressure drop)
Max. working pressure	20 bar (2 MPa)
Min. burst pressure	80 bar (8 MPa)
Temperature range	- 30 °C - + 100 °C
Material coupling	Nickel-plated brass/steel
Material nipple	Nickel-plated brass
Interchangeable with	CEJN 411

411 Technical Data

Nominal flow diameter	10,4 mm
Flow	156 l/min (4 bar pressure drop)
Max. working pressure	35 bar
Min. burst pressure	140 bar
Temperature range	- 30 °C - + 100 °C
Material coupling	Nickel-plated brass
Material nipple	Chrome-plated brass
Interchangeable with	CEJN 417

STAINLESS STEEL SERIES 326

PRICE GROUP A

Compatible with aggressive medias, Series 326 stands up to food, offshore, and steam applications.

Technical Data:

Nominal flow diameter	6,2 mm
Water flow	with valve 18 l/min, without valve 28 l/min
Max. working pressure	70 bar (7 MPa)
Min. burst pressure	280 bar (28 MPa)
Temperature range	- 15 °C - + 100 °C
Material	Stainless steel (AISI 316)
Material seal	Viton

Stainless steel pneumatic couplings can be found on page 6

DYNAVARIACOR SWIVEL CONNECTIONS

PRICE GROUP C

For Compressed Air

DynaVariacor Swivel Connection is a brilliant multidirectional connection that rotates in all directions. The Swivel connection makes working easier in narrow spaces as pipes and hoses remain straight.

- Max. working pressure 10 bar
- Material: Aluminum

VACUUM PUMPS

PRICE GROUP C

Thomas products are mainly manufactured in USA and Germany. Pumps can be used for both pressure and vacuum applications if both values are stated in the table. Our product range withstands Thomas vacuum pumps and oil-free compressors.

Diaphragm pumps are ideal for small local vacuum needs. The diaphragm of the pump separates the mechanical parts of the produced air. Thus the possible contaminants of the air (water etc.) do not get into the mechanics of the pump. As standard delivery, diaphragm and vane pumps do not include the connection cable or plug. On order available as desired.

B-RAD SELECT OFFSET-gear

These torque wrenches are designed to fit to places where other wrenches won't fit. B RAD SELECT OFFSET is based on regular B-RAD SELECT torque wrench and it has all the same technical features. The major difference is the position of the gear. The torque multipliers are placed in an offset position, so that the wrench can be used better to tighten bolts in tight and difficult to reach spaces.

Noise level, max 65 dB
Controlled bolting – accuracy of ± 5 % and repeatability of ± 3 %

Model	Square drive	Torque, Nm		RPM, 1/min	Weight, kg	€ / pc

B-RAD X

B-RAD X is a cordless torque wrench equipped with a brushless DC motor for high durability and accuracy. It delivers up to 15,000 Nm with torque + angle capability for precise and repeatable tightening. The tool is non-impacting and safe to use, featuring a latch-lock battery system to prevent drops from height.

Noise level, max 87 dB
Controlled bolting repeatability of ± 2 %

Model	Square drive	Torque, Nm		RPM, 1/min	Weight, kg	€ / pc
		Min.	Max.

B-RAD-S

B-RAD-S is a battery torque wrench with advanced strain-gauge transducer technology that continuously measures and adjusts torque for high accuracy. With the transducer located at the output end of the multiplier, the tool remains largely unaffected by friction, temperature, or joint variations.

Key features include a brushless motor, torque + angle limits, data logging, Bluetooth connectivity, and a torque check function.

Noise level, max 65 dB
Controlled bolting repeatability of ± 2 %

Model	Square drive	Torque, Nm		RPM, 1/min	Weight, kg	€ / pc

RAD ELECTRIC SERIES

PRICE GROUP G

V-RAD SELECT

The V-RAD SELECT is an electric torque wrench designed for heavy-duty bolting where accuracy, power and ease of use are essential. Its compact and lightweight design makes it ideal for mobile applications, and the non-impacting mechanism ensures smooth, controlled operation.

Torque is simple to adjust with the same two 10 Nm buttons used on the B-RAD SELECT. The tool also offers a numerical display for settings, equal power in forward and reverse, and an extremely durable electric motor and power multiplier for long service life and reduced maintenance.

Noise level, max: 80 dB
Controlled bolting – accuracy of ± 5 % and repeatability of ± 4 %

Model	Square drive	Torque, Nm		RPM, 1/min	Weight, kg	€ / pc
		Min.	Max.

V-RAD SELECT 4000	1"	400	4 000	3	6,2	12 467,00

E-RAD BLU

The E-RAD BLU is a high-precision electric torque wrench with a torque range of 135–16,500 Nm, built for heavy-duty industrial bolting where speed and accuracy matter. It combines the patented RAD gear system with AC servo motor technology, delivering torque application much faster than hydraulic tools.

Key features include Bluetooth connectivity with the RAD Smart Socket™, field calibration, a touchscreen control box, advanced data logging, multi-user password protection, life-cycle counters, torque and angle control, and LED pass/fail indicators.

Noise level, max: 75 dB
Controlled bolting repeatability of ± 2 %

MOMENTO IMPACT SOCKETS

PRICE GROUP C

Momento is the only company in the world that is focused only on the manufacture of impact sockets and accessories intended for professional use. All Momento's products are manufactured in Sweden. The products are durable, ecological and meet special needs, and they are used in many different sectors of the manufacturing industry.

SCHMIDT PRESSES

PRICE GROUP C

Manual presses 1,6 kN - 2,5 kN

Schmidt manual presses are maintenance-free and additional lubrication isn't necessary. They are ideal for many kinds of assembly tasks. These presses have a linear force curve throughout the stroke.

R-models are equipped with a return-stroke-lock that ensures that the stroke is done all the way to the end.

Accessories, such as ergonomic handle, counter and micrometer for precise adjustment of the end position, are also available.

Press type	Nominal force, kN	Working stroke, mm	Throat depth, mm	Working height, mm	Weight, kg	€ / pc
5	1,6	0-40	86	55-190	11	1014,00
5R	1,6	17-40	86	55-190	11	1 824,00
3	2,4	0-70	86	80-120	22	1 380,00
3R	2,4	18-70	86	80-120	22	2 190,00
6	2,4	0-70	86	120-360	30	1 667,00
6R	2,4	18-70	86	120-360	30	2 479,00
1	2,5	0-80	86	120-260	23	2 648,00
1R	2,5	26-80	86	120-260	23	3 460,00
2	2,5	0-80	86	145-380	31	2 921,00
2R	2,5	26-80	86	145-380	31	3 732,00

Toggle presses 5 kN - 15 kN

Toggle presses are ideal for applications, where high force is required at the end of the stroke, for example marking and cutting. Toggle presses achieve their maximum force at the last tenths of millimetres. There is barely any force at the beginning of the stroke.

R-models are equipped with a return-stroke-lock that ensures that the stroke is done all the way to the end.

Accessories, such as ergonomic handle, counter and micrometer for precise adjustment of the end position, are also available.

Press type	Nominal force, kN	Working stroke, mm	Throat depth, mm	Working height, mm	Weight, kg	€ / pc
13	5	40	65	65-180	12	1014,00
13R	5	40	65	65-180	12	1 824,00
11	12	0-45	86	80-210	23	1 624,00
11R	12	20-45	86	80-210	24	2 435,00
15	12	0-45	86	110-350	29	1 778,00
15R	12	20-45	86	110-350	29	2 532,00
14	12	60	86	90-220	24	1 791,00
